

Findings/Recommendations

**Information itself insufficient.
Disconnected elements create
confusion. People have trouble
coordinating and connecting the
dots... ..**

**Confusion, tentativeness over basic
principles: e.g., probability
range=0-100%, median divides
upper and lower half of
distribution; forecasts address all
three terciles.**

**Structure information within product format.
Explicit reinforcement of basic principles.**

**Assessment of Probabilistic Forecasts Using
Field Surveys of Resource Management
Professionals: Preliminary Results**
